

Count the Colours with Carrie Copper

All the sunbathers on this beach whose names begin with R are really wearing disappearing blue coloured sun block spray.

The spray goes on blue to show they haven't missed any places and then disappears.

What percentage of the sunbathers are wearing blue sun block spray?

20% of the sunbathers using blue sun block spray are using Sun Protection Factor 25.

How many sunbathers wearing blue sun block spray are not using Sun Protection Factor 25?

50% of the sunbathers not wearing blue sun block spray are wearing ordinary suncream with a Sun Protection Factor of 20. All the others are not wearing any kind of sunscreen. How many are they?

How many of the people on the beach should not be sunbathing?
