insight into eyesight

Name: _____

How we see

Can you link the parts of the eye to what they do?

Write the letter (A - E) of each function, into the correct label on the diagram below.

- A** Controls the amount of light entering the eye.
- B** Absorbs light and prevents reflections inside the eye.
- C** Sends messages from the eye to the brain.
- D** Focuses an image onto the retina.
- E** Converts the image into an electrical impulse.

score =

This page is designed for printing and filling in by hand. Write your answers in the spaces provided and ask your teacher to mark it.
